*Tortue fait le tour des champignons pour aller manger une salade.*

The worksheet contains six rows of a tracing exercise. Each row features a drawing of a turtle on the left and a drawing of a lettuce head on the right. A path of mushrooms connects them. The path begins with a solid line that loops around the first mushroom, then continues as a dashed line that loops around the subsequent mushrooms. The number of mushrooms in the path decreases from four in the first row to one in the sixth row.
